## Contents

Assuming variables PRF, CR, CB and `attachment`. Additionally, Tx is an indicator for treatment, and x, y and z represent the control variables.

SPSS <sup>1</sup>	Stata
REGRESSION	<code>regress</code>
/MISSING LISTWISE	
/STATISTICS COEFF OUTS	
/CRITERIA=PIN(.05) POUT(.10)	
/NOORIGIN	
/DEPENDENT <code>attachment</code>	
/METHOD=ENTER PRF CR CB Tx z	

<sup>1</sup>SPSS syntax is constantly in flux, but this is a best guess at appropriate commands.
